

WORLD

AIDS

DAY

1 December 2020

**Integrated  
approach in  
combating  
the triple  
pandemics:**

HIV and AIDS,  
TB and COVID-19

Sexual and respiratory health  
and education are important.

We have  
the knowledge  
and the tools to  
stop HIV/AIDS.

Know your  
rights and  
responsibilities.

COVID-19 is  
an infectious  
respiratory disease.  
Like TB the virus  
is spread by air  
when an infected  
person coughs  
or sneezes.

Regular screening  
can help you  
fight TB and  
other respiratory  
infections before  
they progress.
